

**MEMORANDUM No. 147**

**DATE:** March 24, 2020  
**TO:** All Operators and Oil and Gas Purchasers  
**FROM:** Nebraska Oil and Gas Conservation Commission  
**SUBJECT:** Increase of Conservation Tax Mill Levy

The present mill levy of five (5.0) mills per dollar is not providing income levels to meet the operating expenses of the Commission.

The Commission has entered Order No. R-922, which increases the mill levy of the Conservation Tax on all crude oil, dry gas, and casinghead gas produced, saved, and sold from lands in the State of Nebraska, to twelve (12.0) mills per dollar.

The increase in the conservation tax mill levy will be effective at 12:01 a.m., May 1, 2020, and will apply to the production which is produced, saved, and sold subsequent to that hour and date.

Please make certain that this Memorandum is routed to the personnel within your organization who are responsible for tax matters.
