

TITLE 267 – NEBRASKA OIL AND GAS CONSERVATION COMMISSION

CHAPTER 3 – DRILLING, DEVELOPMENT, PRODUCING AND ABANDONMENT

**015 RE-DRILLING OR DRILLING DEEPER**

When a well is re-drilled or drilled deeper by the original operator, the operator shall advise the Director or authorized agent of their intentions by filing Form 4 and stating thereon the proposed work to be done and the anticipated results of the work.

If the re-drilling or drilling deeper is to be done by anyone other than the original operator, they shall file Form 2 and the two hundred dollar (\$200) permit fee and state on the form that this well is to be re-drilled or drilled deeper.

Upon completion of the work Form 5 shall be filed if the well is an oil or gas producer, injection or disposal well, or shut-in with casing in the hole. If the well is a dry hole, Form 6 shall be filed. Copies of any logs and tests made should accompany these forms.
